

SYNTHETIC SPORTS TURF GROOMER

The Synthetic Groomer with its second generation brush design, conditions synthetic turf surfaces while delivering greater labor efficiencies, ease of operation, and a lower total cost of ownership.

Simple in design with a heavy-duty construction, the focal point of this patented design are the precise brush dimensions and angles. This allows grooming in four directions, standing up turf fibers and leveling infill material.

- **Stands up Synthetic Fibers**
- **Used in Wet and Dry Conditions**
- **True One-Pass Performance**
- **Patented Quadruple Direction Design**
- **Superior Balance for Consistent Grooming**
- **Works on All Infilled Surfaces**

The Synthetic Sports Turf Groomer has 16 Super Duty Blue brushes set at various angles to the direction the unit is being towed.

It has perfect balance side to side and front to back — allowing for smooth brushing with no hopping. The electric actuator provides almost infinite adjustment control, from wheels down transport to wheels up brushing.

The Groomer stands the turf surface up and assists in moving the top layer of infill, leveling low spots and depressions left after play.
